

## ABOUT ME

My name is Sam Raitan, and I'm a Full-Stack Developer in Java, NodeJS, and MongoDB, with experience building various small projects using these technologies.

I kicked off my professional career in 2021 when I started my BSc in Computer Science at the Ashkelon Academic College. Why Computer Science? Because it's my calling. I love turning ideas into reality.

Since then, I haven't stopped coding. Every chance I get, I do online courses on a variety of coding subjects and develop projects to make sure I'm gaining deep and valuable knowledge in these fields.

You'll usually find me brimming with ideas and running to try them out!
